Some comment & suggestions we are given by the participants as under

1. Each session was very informative & useful for implementing in new curriculum at college level.
2. Most of the sessions are interactive.
3. Some sessions have lengthy duration, it should be minimized.
4. Deriving learning objective from the competencies is very tedious job, it is not easy, however it is more valuable in implementation of new curriculum, so if possible MEU members will arrange and sensitize the faculty members time to time.

5. Learner Doctor clinical teaching is really somehow different from existing curriculum clinical teaching, so it helps in deep learning about clinical skills in the learners, it is will be utilize in clinical posting of the students and guided and monitored by MEU, coordinators & curriculum committee members.
